TOWABLE GRILL INSTRUCTIONS

TOWING

Hook up to vehicle. Tighten down the hitch.

Make sure the safety chain and lights are hooked up

Lighting The Grill

Turn on the propane tank.

Turn the valve knob to the pilot position (straight up).

Push knob in and hold. While continuing to hold light the pilot light with igniter button located above the valve. Once the pilot is lit, continue to hold in the knob for 25 seconds. After the 25 second, release the knob. The pilot should stay on.

Then you turn the knob to the on position. This will light the grill.

When finished using the grill, turn the valve back to the off position. Once the grill has shut off, you must turn off the main supply or the pilot light will continue to burn.

Thank you for choosing TLC Rents
